PLANT AND SOIL

Contents Volume 284 Nos. 1–2 June 2006

Commentary

Partitioning the components of soil respiration: a research challenge
E.M. Baggs **1–5**

Indirect partitioning of soil respiration in a series of evergreen forest ecosystems
M. Rodeghiero and A. Cescatti **7–22**

Yield of micropropagated sugarcane varieties in different soil types following inoculation with diazotrophic bacteria
A.L.M. de Oliveira, E.L. de Canuto, S. Urquiaga, V.M. Reis and J.I. Baldani **23–32**

Genotype and fungicide effects on late-season root growth of winter wheat
K.E. Ford, P.J. Gregory, M.J. Gooding and S. Pepler **33–44**

Responses of maize grain yield to changes in acid soil characteristics after soil amendments
C. The, H. Calba, C. Zonkeng, E.L.M. Ngonkeu, V.O. Adetimirin, H.A. Mafouasson, S.S. Meka and W.J. Horst **45–57**

Lychee tree parameters for water balance modeling
K. Spohrer, C. Jantschke, L. Herrmann, M. Engelhardt, S. Pinmanee and K. Stahr **59–72**

Mapping QTLs for nitrogen uptake in relation to the early growth of wheat (*Triticum aestivum* L.)
D. An, J. Su, Q. Liu, Y. Zhu, Y. Tong, J. Li, R. Jing, B. Li and Z. Li **73–84**

Microbial response over time to hydrologic and fertilization treatments in a simulated wet prairie
J.L. Mentzer, R.M. Goodman and T.C. Balser **85–100**

Expression, localization, and regulation of the iron transporter LeIRT1 in tomato roots
A. Schikora, O. Thimm, B. Linke, T. J. Buckhout, M. Müller and W. Schmidt **101–108**

Dynamics of zinc uptake and accumulation in the hyperaccumulating and non-hyperaccumulating ecotypes of *Sedum alfredii* Hance
X.E. Yang, T.Q Li, X.X. Long, Y.H. Xiong, Z.L. He and P.J. Stoffella **109–119**

Influence of nitrogen application rate on the magnitude of root and shoot growth flushes of *Viburnum odoratissimum* Ker-Gawl
G. Schoene and T. Yeager **121–128**

Turfgrass (*Cynodon dactylon* L.) sod production on sandy soils: I. Effects of irrigation and fertiliser regimes on growth and quality
L. Barton, G.G.Y. Wan and T.D. Colmer **129–145**

Turfgrass (*Cynodon dactylon* L.) sod production on sandy soils: II. Effects of irrigation and fertiliser regimes on growth and quality
L. Barton, G.G.Y. Wan and T.D. Colmer **147–164**

Grain ^{15}N of crops applied with organic and chemical fertilizers in a four-year rotation
W.J. Choi, M.A. Arshad, S.X. Chang and T.H. Kim **165–174**

Cropping intensity and rainfall effects on upland rice yields in northern Laos
K. Saito, B. Linquist, B. Keobualapha, K. Phanthaboon, T. Shiraiwa and T. Horie **175–185**

Oxidation of the enzymes involved in nitrogen assimilation plays an important role in the cadmium-induced toxicity in soybean plants
K.B. Balestrasse, S.M. Gallego and M.L. Tomaro **187–194**

Effects of continuous cucumber cropping and alternative rotations under protected cultivation on soil microbial community diversity
H. Yao, X. Jiao and F. Wu **195–203**

Ecological germination requirements of the aggregate species *Teucrium pumilum* (Labiateae) endemic to Spain
M. Ferriol, I. Pérez, H. Merle and H. Boira **205–216**

Phosphorus intensity determines short-term P uptake by pigeon pea (*Cajanus cajan* L.) grown in soils with differing P buffering capacity
P. Pypers, J. Delrue, J. Diels, E. Smolders and R. Merckx **217–227**

The effect of metal diffusion and supply limitations on conditional stability constants determined for durum wheat roots
P.M.C. Antunes and B.A. Hale **229–241**

Effects of *Canavalia ensiformis* and *Mucuna pruriens* intercrops on *Pratylenchus zeae* damage and yield of maize in subsistence agriculture
O.J. Arim, J.W. Waceke, S.W. Waudo and J.W. Kimenju **243–251**

Enhanced soil and leaf nutrient status of a Western Australian *Banksia* woodland community invaded by *Ehrharta calycina* and *Pelargonium capitatum*
J. L. Fisher, E. J. Veneklaas, H. Lambers and W. A. Loneragan **253–264**

Buckwheat accumulates aluminum in leaves but not in seeds
R.F. Shen, R.F. Chen and J.F. Ma **265–271**

Water relations and gas exchange in olive trees under regulated deficit irrigation and partial rootzone drying
J.E. Fernández, A. Díaz-Espejo, J.M. Infante, P. Durán, M.J. Palomo, V. Chamorro, I. F. Girón and L. Villagarcía **273–291**

Uptake and translocation of ^{134}Cs by maize roots as affected by heterogeneous distribution of ^{134}Cs
T. Centofanti and E. Frossard **293–303**

Seasonal fluctuations in soil phenolics of a coniferous forest: effects on seed germination of different coniferous species
A. Muscolo and M. Sidari **305–318**

Assimilate partitioning affects ^{13}C fractionation of recently assimilated carbon in maize
M. Werth and Y. Kuzyakov **319–333**

Soil nitrate accumulation, leaching and crop nitrogen use as influenced by fertilization and irrigation in an intensive wheat–maize double cropping system in the North China Plain
Q. Fang, Q. Yu, E. Wang, Y. Chen, G. Zhang, J. Wang and L. Li **335–350**

Effect of lime, dicyandiamide and soil water content on ammonia and nitrous oxide emissions following application of liquid hog manure to a marshland soil
M.S. Mkhabela, R. Gordon, D. Burton, A. Madani and W. Hart **351–361**

Rice can acclimate to lethal level of salinity by pretreatment with sublethal level of salinity through osmotic adjustment
M. Djanaguiraman, J.A. Sheeba, A.K. Shanker, D.D. Devi and U. Bangarusamy **363–373**

Response of soil properties and maize yield to simulated erosion by artificial topsoil removal
D.J. Oyedele and P.O. Aina **375–384**

Phosphorus benefits from grain-legume crops to subsequent maize grown on acid soils of southern Cameroon
M. Jemo, R.C. Abaidoo, C. Nolte, M. Tchienkoua, N. Sanginga and W.J. Horst **385–397**
